Icom CS-M92D/M424 Programming Software We are not a simple webshop, we offer relevant special services for the products! Icom CS-M94D Programming Software Description. This is the new IC-M94D version of the program. The program has been redesigned and modified. The program has a better user interface and the program supports IC-M940 frequencies. Icom Programming Software. As with Icom's radio programming software, the codes and menus are stored in the IC-M. The programming software can be used to program two way radios, such as the Icom IC-M92, IC-M94, IC-M94D, IC-M94DHC and the IC-M925, or you can use it to get the frequencies and functions of other radios that are not read and programmed by the radio's user interface. Programming this way enables you to program the frequency and code of a radio. Programmable repeaters like the IC-M932 or IC-M932A are also included. The software also supports the VHF DSC and CTCP protocols. Both the DSC and CTCP protocols are used to transfer the data from the radio to the computer or vice-versa. By the way, you can program not only radios but also DSC or CTCP-equipped Icom VHF radios, such as IC-M942, IC-M943, IC-M950, etc. Icom CS-M92D/M424 Programming Software V1.1 New Function We have added a new function. Now you can read and program the frequency of other radios on the same channel as the radio that is being read or programmed. This Icom CS-M92D/M424 Programming Software contains detailed information on how to use the software. The following are some of the benefits you get when you buy this Icom CS-M92D/M424 Programming Software.

- All the menus of the radio are programmed. The programming software can be used to program the VHF-DSC, VHF-CTCP and the VHF DSC/CTCP radios. The frequency can also be modified.
- The programming software is a free update of the previous version of the software. The previous version is not included in the download kit.
- This software is available in two formats. It is available in a single floppy disk or it 2d92ce491b
